

GitHub 进不去解决办法

打开IP查询网站: <https://www.ipaddress.com/>

分别输入并查询 *github.com* 和 *github.global.ssl.fastly.net* 网址的 IP

The screenshot shows the IPAddress.com website interface. At the top, it displays the user's IP address: 123.118.218.59. Below this, there is a search bar where 'github.com' has been entered. A red box highlights the search bar, and a red arrow points to it with the text '输入并回车' (Enter and press Enter). Below the search bar, the results for 'github.com' are shown, including the IP address 140.82.112.4, which is also highlighted with a red box and labeled '记录' (Record). The page also features sections for 'Top Sites', 'Trending Sites', 'Recently Viewed Sites', and 'Recently Analyzed Sites'.
